ALEXANDRU CINTA

IoT Service Support Engineer | Technical Operations | Networking & Infrastructure | Leadership

Craiova, Romania | +40 767 039 818 | alexandru.cinta@yahoo.com | GitHub | Portfolio

PROFESSIONAL SUMMARY

IoT Service Support Engineer with a strong background in team leadership, customer operations and technical problem-solving. Experienced in IoT connectivity support, incident troubleshooting, service monitoring and technical escalations using ServiceNow, Linux and Grafana. Combines operational experience with hands-on software and infrastructure development through Power BI and Power Apps solutions, a multi-tenant SaaS platform, and a self-hosted networking and virtualization HomeLab.

CORE TECHNICAL SKILLS

IoT & Operations	IoT Connectivity, SIM Management, APN, Roaming, Incident Management, SLA Tracking, Technical Escalation
Monitoring & ITSM	ServiceNow, Grafana, Log Analysis, Service Monitoring, Microsoft 365
Networking & Infrastructure	TCP/IP, DNS, DHCP, OPNsense, Pi-hole, Unbound, Tailscale, Proxmox VE, Virtualization
Software Development	Python, FastAPI, JavaScript, React, React Native, REST APIs, SQL, PostgreSQL, Supabase, Git/GitHub
Data & Low-Code	Power BI, Power Apps, Microsoft Power Platform

PROFESSIONAL EXPERIENCE

IoT 1st Line Service Support Engineer

VOIS | May 2025 - Present | Craiova, Romania

- Provide first-line support for IoT connectivity services, including SIM management, APN and roaming-related incidents.
- Perform ticket triage, incident analysis, log analysis and technical troubleshooting; escalate complex cases to L2/L3 teams.
- Monitor service alerts and operational indicators using Grafana and internal monitoring platforms.
- Manage incidents and service requests through ServiceNow, maintaining documentation, prioritization and SLA tracking.
- Collaborate with technical teams and communicate with users and customers throughout investigation and resolution.
- Support access management and contribute to technical procedures and knowledge documentation.
- Developed IoT Lighthouse, a Power BI dashboard centralizing operational KPIs, and IoT Local OpCo Tracker, a Power Apps solution for escalation tracking.

Team Leader, Customer Support & Projects

Vodafone Romania | July 2023 - May 2025 | Craiova, Romania

- Led and supported a customer service and project team through coaching, mentoring, performance reviews and operational guidance.
- Monitored team KPIs, service quality and operational performance to identify improvement opportunities.
- Coordinated customer-support and process-improvement initiatives with cross-functional teams and stakeholders.
- Acted as escalation point for complex customer and operational issues, ensuring ownership and timely resolution.
- Supported project planning and execution with focus on timelines, quality standards and customer experience.

C2 General

Team Leader, Customer Service Support

Vodafone Romania | January 2022 - June 2023 | Craiova, Romania

- Managed and developed a customer service team through coaching, feedback, mentoring and performance support.
- Monitored operational KPIs and supported improvements in service quality, productivity and customer outcomes.
- Supported onboarding and professional development while maintaining a collaborative and inclusive team environment.
- Identified and implemented operational improvements to strengthen team performance and working practices.

Account Manager, Business Corporate Accounts

Vodafone Romania | June 2021 - January 2022 | Craiova, Romania

Managed strategic relationships with corporate accounts, translating business needs into tailored solutions.

Consultant Call Center

Vodafone Romania | July 2020 - June 2021 | Pitesti, Romania

Sales Advisor

Leroy Merlin Romania | July 2019 - May 2020 | Craiova, Romania

SELECTED TECHNICAL PROJECTS

Edifya | Multi-Tenant School Management SaaS

Personal Project | Ongoing

Designed and developed a multi-tenant educational platform with web and mobile applications for schools, teachers, students and parents.

- Built a FastAPI and Supabase/PostgreSQL REST backend, a React web application and a React Native/Expo mobile application.
- Implemented JWT authentication and role-based access control for five user roles.
- Designed a multi-tenant relational model for schools, users, classes, subjects, grades, attendance, schedules and announcements.
- Integrated Resend email and Twilio WhatsApp notifications, bulk user provisioning and temporary-password workflows.

Stack: Python, FastAPI, React, React Native, Expo, PostgreSQL, Supabase, REST, JWT, Tailwind CSS, Git/GitHub. GitHub repository

HomeLab | Networking & Virtualization Environment

Personal Infrastructure Project | Ongoing

- Deployed Proxmox VE on a Lenovo ThinkCentre M920Q and a dedicated OPNsense firewall/router on a Lenovo ThinkCentre M710Q.
- Built the LAN with a TP-Link TL-SG108E managed switch and Omada EAP225 wireless access point.
- Configured DNS and DHCP services, Pi-hole with OPNsense Unbound, Home Assistant and Tailscale secure remote access.
- Use the environment for practical networking, troubleshooting, virtualization and infrastructure experimentation.

EDUCATION, TRAINING & LANGUAGES

Economic Informatics

Faculty of Economics and Business Administration | September 2023 - Present | Craiova, Romania

Full Stack Developer: Python, HTML, CSS, JavaScript and MySQL

Software Development Academy | December 2022 - Present | Remote

Training: Scrum foundations, Agile principles, code review, planning and estimation. | Language: English | Driving Licence: Category B
